Insight. Experience. Commitment.

FARM INSURANCE PROGRAM

Farms are the heartbeat of many communities. Whether yours has been in the family for generations, is an owned business, or part of a larger operation, it's a place you call home.

As agricultural landscapes continue to change, it's important to manage potential risks with someone who thoroughly understands the agri-business, both on a personal and operational level.

Our partners have been in farming communities for more than 150 years. In fact, many were early pioneers in forming local farm mutual companies. With their grassroots knowledge of local farming, it's no wonder they continue to be leaders in farm insurance protection generation after generation.

Our farm insurance program provides you with the option to insure many different kinds of property as well as offering various levels of coverage.

We offer protection for:

- Farm Dwellings with Personal Property
- Additional Living Expenses
- Scheduled Personal Articles
- Farm Outbuildings
- Farm Produce
- Livestock
- Livestock Mortality Coverage
- Farm Machinery
- Farm Business Interruption
- Builders' Risks
- Farm and Personal Liability
- Non-Owned Livestock Liability
- Farmer's Limited Pollution Liability
